

# Asset Management

Cireson Asset Management directly integrates with Microsoft Service Manager to track all of your hardware and software assets from purchase to retirement.

Provide Asset Managers an effective lifecycle view, revealing precisely where a particular asset is at any given moment, and whether or not it is providing value to your business. Track all IT asset details from the status, location, department, cost, center, owner, warranty, maintenance, and software licensing to gain visibility and control into your operational costs.

## Included Apps

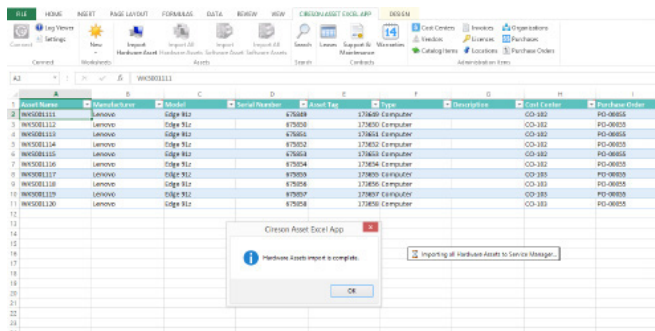

NAME	VERSION	STATUS	TYPE	PURCHASE COUNT	INSTALL COUNT
Acrobat Pro 9 (Marketing)	10	Approved	Client App	1	1
