

Free Community Apps for Microsoft Service Manager

Analyst Portal

A web-based portal for Microsoft Service Manager featuring Incident Management for Analysts. 100% browser, device, and OS freedom.

Self-Service Portal

A complete replacement of the Microsoft Self-Service Portal for Service Manager. 100% browser, device, and OS freedom.

Auto Close

Configure how many days an incident, service request, change, etc. should be closed within.

Advanced Send Email

Allows an Analyst to send notifications to the affected user or other recipients from the context of an Incident in the Service Manager Console.

Time Tracker

Record time spent working on other types of work items - either directly from a view of Work Items via the Portal or from a form.

Notify Analyst Free

Support incident & service requests along with notification workflows.

Service Desk Ticker

Create an announcement within Service Manager & communicate directly to an employee's computer in real time
